THIS IS UNEVALUATED INFORMATION FOR THE RESEARCH  
USE OF TRAINED INTELLIGENCE ANALYSTS  
25X1

The Soviets have designed and are now using an electro-hydraulic gun for shooting fireproof clay into the slag notches of blast furnaces. This new gun has a cylinder capacity of about 140 cubic feet for the charge of fire proof clay. The electric drive and original hydraulic system of reciprocal action parts are some of this gun's new features.
